PRINCIPLES OF LAW

1. The Montana Water Court has the authority to determine the extent of all water rights in the state as they existed prior to July 1, 1973. *Fellows v. Saylor*, 2016 MT 45, ¶ 25, 382 Mont. 298, 367 P.3d 732; §§ 85-2-233, -102(12), MCA. The purpose of the Water Court is to adjudicate rights to the use of water as they existed on July 1, 1973. *In re Clark Fork River*, 254 Mont. 11, 17, 833 P.3d 1120 (Mont. 1992).

2. “The Water Court is not bound by settlement agreements. Any settlement reached by the parties is subject to review and approval by the Water Court.” Rule 17(a), W.R.Adj.R.; *In re Argabright*, 2014 Mont. Water LEXIS 9, 41I 265 (December 12, 2014).

3. Where a claimant agrees to reduce or limit an element of a claim, “the water court does not need to determine whether the burden of proof has been met.” Rule 17(c), W.R.Adj.R. The Court may accept the requested reduction or limitation “without further presentation of evidence.” Rule 17(c), W.R.Adj.R.

CONCLUSIONS OF LAW

1. The Stipulation entered into by the parties conforms to applicable law and, accordingly, the record supports the resolution of the objections filed by the United States and the Crow Tribe to the above-captioned claims, as well as the modification of claims and the generation of implied claims as discussed above. The issue remarks have been resolved and should be removed from the claims.

2. The generation of an implied claim is intended to address situations where a single statement of claim appears to contain more than one separate water right. Order

Amending and Adopting Masters Report at 4, *Eliasson Ranch Company v. Rodegheiro*, Water Court Case 40A-115 (June 28, 2004) (hereinafter 40A-115 Order). In that regard, the purpose of generating an implied claim is to “separate two or more water rights into separate claims so that they are accurately identified for adjudication and administration.” *Id.* at 5. Ordinarily, the DNRC requests Water Court authorization for an implied claim pursuant to Rule 6.IV of the Water Right Claim Examination Rules. *Id.* at 4. Although this rule applies to claims being examined prior to the issuance of a preliminary decree, the Water Court has routinely cited the rule when generating implied claims post-preliminary decree. *Id.*

3. When determining whether to grant an implied claim, the Court generally relies on the statement of claim and any material in the claim file that helps to clarify that information. 40A-115 Order at 4. As previously recognized by the Court, “[t]he most common indicator for an implied claim is an overstatement of some element of the claim on a single statement of claim form, such as: listing points of diversion on two or more sources[.]” *Id.* at 4-5.

4. Implied claims should be generated as discussed above.

RECOMMENDATIONS

1. Upon review of the record in this case, the claims should be modified, and implied claims should be generated as discussed above. The issue remarks should be removed from the claims. The objections should be resolved.

Post Decree Abstracts of Water Right Claims are attached to this Master’s Report for review.
